FIG. 34

This exploded perspective view shows the assembly 12, which includes a base plate 200 with a central opening 206. A grid of rectangular plates 220 is positioned above the base plate. These plates are interconnected by a network of vertical and horizontal pins or rods 170. The assembly is further secured by a top plate 204, which is held in place by a series of fasteners 218. The fasteners 218 are shown in an exploded position, indicating they are used to secure the top plate 204 to the underlying structure. The entire assembly is designed to provide a structured, multi-layered support or containment system.
